

Dev Das

I ship things that go live.

+92 332 8200416 devdas.tech10@gmail.com devdas.tech in/dev-das-webdev github.com/devd-328

I take products from **empty repo to live deployment** on my own, the data model, auth, APIs and AI features included. Full-stack across React, Next.js and Supabase, with the fundamentals to back it up: OOP, data structures and relational databases. Most of what I build is **already in production**, not sitting in a folder.

SELECTED PROJECTS

BudgetBuddy

LIVE · AI-POWERED

Personal-finance PWA with multi-user debt tracking, a **Groq-powered AI financial assistant**, and live Chart.js visualizations. Built the full data model, auth, and serverless backend, then **deployed to production on Vercel**.

React · Tailwind CSS · Supabase · Groq API · Chart.js

ConnectSquare

LIVE

Full-stack event discovery and volunteering platform with **role-based access control**, admin approval workflows, and secure authentication.

Next.js · React · Supabase · Tailwind CSS

AgriConnect

GITHUB

Farm-to-table MVC platform connecting farmers directly with consumers through MySQL-backed product listings and farmer profiles.

Laravel (PHP) · Bootstrap · MySQL

Personal Portfolio

LIVE

Portfolio and blog with dark/light mode, responsive design, and performance-optimized builds.

Next.js · React · Tailwind CSS · Supabase

EXPERIENCE

AI Intern — Frontend AI Engineering

2026 – Present

FlyRank AI

- Working on frontend AI engineering, building structured, production-facing AI workflows and interfaces.

Trainee Sales Executive

May – Jul 2025

HumanTek · Karachi

- Ran live product demos and managed client pipelines, learning how software gets sold and what users actually ask for.
- Rare for a developer: comfortable in front of clients and able to translate business needs into what to build.

OPEN SOURCE

Social Summer of Code (SSoC) 2026 — currently contributing.

GirlScript Summer of Code 2024 — merged PRs into open-source React/JS projects and collaborated on code reviews with distributed teams.
